Staffing Standards

Compensation Board Criteria For Allocating New Positions In Treasurers' Offices

In determining the allocations of additional positions, the Compensation Board considers the following criteria:

1. The position (or positions) must be requested by the Treasurer as part of the Compensation Board's annual budget process.
2. The position requested must perform only statutorily prescribed duties of the Treasurer.
3. The Treasurer's office must have a PC, or be connected to the city/county system or have such systems scheduled for installation within 12 months.
4. Funds and positions must be appropriated by the General Assembly.
5. The Compensation Board will use the staffing methodology and weighted three-year average workload criteria developed by the Workload Study Committee to determine the appropriate level of Compensation Board staff support for each office requesting additional positions.
6. The Compensation Board shall determine the number of additional positions to be allocated to any one office based upon criteria 1-5, inclusive, and additional positions shall be allocated in the order of percentage of need, where the offices with the highest percentage of need will receive positions first. The percentage of need is determined by calculating the percentage that the number of additional positions needed is of the total number of current positions.
7. Because the current staffing of Treasurers' offices includes hourly-wage staff expressed as F.T.E. positions, any office receiving a new position shall not have its hourly-wage funds reduced equivalent to the salary of the new position.

Staffing Methodology

The methodology used to determine appropriate staffing levels in each treasurer's office was developed by the Workload Study Committee and adopted by the Compensation Board.

The methodology considers current Compensation Board funded positions and hourly wage funded employees or full-time equivalent positions. A three year weighted average of workload, as reported by Treasurers, is calculated.

The workload was weighted to take into account the difficulty or ease of performing the duties. The transactions for each of the categories were totaled and averaged. Then the percentage was calculated, with 100% as the total number of reported transactions in all categories. Similarly, the amount of time spent by the offices on each function was totaled and averaged, and a percentage of total time was then calculated for each category.

The percentage of transactions for each category was divided by the percentage of time for that category. This resulted in the weighted factor used in the analysis of workload. This weighted factor approach gives more weight to those transactions which are more time-intensive and less weight to those which require less time to complete.

The Treasurers' duties which were deemed to be local, such as vehicle decal issuance and those in the "other duties" category were removed from the total weighted transactions used in performing the statistical analysis.

Using the hourly wage funded amount and dividing by the step one salary of a deputy I position, the number of part-time FTEs is ascertained. This is added to the Compensation Board approved full-time employees for the total personnel.

Linear regression was used to assess the relationship between workload and current Compensation Board approved FTEs. Regression analysis is a statistical technique used to explain the relationship between factors, such as workload and current Compensation Board approved FTEs.

Workload Elements, Weights, and the formula to determine staff needed are as follows:

<u>Workload Elements</u>	<u>Weights</u>
Real Estate Tax	1.55
Personal Property Tax	1.08
Collections	.99
Vehicle License (Decals)	.79
State Income Tax	3.08

$$\text{Staff Needed} = .000036 * (\text{total weighted transactions}) + 1.92$$
